# AJAX
WIRELESS ALARMS

The most awarded wireless security system in Europe

Ajax Alarms is the next generation in wireless alarm security. The Ajax security system is perfect for your apartment, home, office , commercial building, church or camping ground. By choosing Ajax, you get integrated protection that is easy to manage, tamper proof, pet friendly and responds instantly to attacks. Ajax baffles intruders, detects fire, detects flooding and controls appliances. The **free** Ajax phone App turns your security components into one easy-to-manage system. Arm Ajax with a few taps. Switch on appliances in advance. Get instant notifications through SwiftAlerts, a secure protocol that protects your data. Ajax analyses threats, filters false alarms and alerts you of any real danger. Additional protection against sabotage makes Ajax virtually unassailable, along with the premises it protects.

Mobile Panic Feature

Every person connected to your Ajax Alarm system has a virtual 'Panic Button' on their Ajax phone App. When pressed, the Panic Button will alert, in real time, every person connected, advising who activated it and where. All users will receive the notification and a Google Maps Pin Drop identifying the location, globally.
Button

Wireless personal button. Adhere to a surface or carry on wrist or necklace. Can be programmed as a panic button or to control light switches, garage doors, gates etc.

Remote/SpaceControl

Two-way wireless Remote with a panic button.

Available on the AppStore

Get it on Google Play

PhoneApp

Download the **free** app on your android or iPhone

Hub & Hub2

Intelligent control panels with ethernet connection and Vodafone SIM option. Ajax Hub enables the performance of each device in the system. It monitors and controls devices using advanced wireless technology. Connects up to **50** users, **100** devices and **9** partitions.
* MotionCam detector camera requires Hub2 for operation.

Hub Plus

Intelligent control panel with Wi-Fi and dual Vodafone or 2 degrees SIM options. Connects up to **99** users, **150** devices and **25** partitions.

RangeExtender

For extending the wireless signal even further

WARRANTY

All Ajax products have a 4 year manufacturer's warranty (excluding batteries).   February 2020

InternalSiren
Wireless indoor siren.

ExternalSiren
Wireless outdoor siren with strobe light.

FireProtect
Smoke and 'Rate of Rise' heat detectors. Can work independently without Ajax Hub. Built-in siren.

FireProtect Plus
Also detects carbon monoxide.

TouchPad
Two-way wireless touchpad. This is optional as AJAX can be controlled from a smartphone or Remote.

MotionProtect Outdoor
Wireless outdoor. motion detector with anti-masking function.

NEW

MotionCam Camera
Incorporates both a PIR sensor and Camera. Takes a series of photos and sends them instantly to the user's phone. The camera operates only when the system is in 'Armed' mode and activated by intrusion. Controls security and not your personal life. Will not take photos on request and is not continually watching you! All photos are encrypted. Ignores pets up to 50cm high/20kg using SmartDetect algorithm.
* MotionCam detector camera requires Hub2 for operation.

MotionProtect
Wireless pet immune motion detector

MotionProtect Plus
Dual microwave and passive. Pet immune up to 20 Kg. For harsh or higher security environments.

CombiProtect
Wireless motion and glass break detectors with pet immunity.

GlassProtect
Wireless glass break detector.

DoorProtect
Wireless magnetic door opening detector.

DoorProtect Plus /WindowProtect
Magnetic opening detector with shock and tilt sensors. Built in accelerometer. Ideal for detecting window movement.

NEW

MotionProtect Curtain - indoor
Narrow-beam indoor motion detector, scanning vertically across sliding doors, roller doors, windows etc. Protects the perimeter of your home while you move around freely inside. Each device incorporates two Infrared sensors. Has many commercial and residential applications.

LeakProtect
For protection against floods. Senses water where it should not be! For use in bathrooms, laundries, kitchens, basements, etc. Sends an alert when water is sensed and also advises when it dries.
